Introduction

Boom Shiba Token

The Next Big Thing on
BSC with BUSD
Rewards

Boom Shiba is cute but with a lot of BITE! \$BoomShiba is a deflationary coin designed to become more scarce over time. All holders of Boom Shiba will earn BUSD that is automatically sent to your wallet by simply by holding Boom Shiba's in your wallet. Watch the amount of BUSD grow in your wallet as all holders automatically receive a 7% fee from every transaction that happens on the Boom Shiba network. The community receives more BUSD from the fees generated each transaction.

ABOUT REWARDS

\$BOOMSHIBA Holders will receive BEP-20 i.e. Binance-Pegged version of these of USD Equivalent coin BUSD.

What are Binance-Peg Tokens?

'Peg' means to tie the value of one crypto to another. The main purpose of these tokens is to allow trading of the assets in DEXes that is not currently possible due to their different blockchains.

Once rewards are sent to users. Users will be free to sell/swap the coin/token they have received as they desire.

Our Values

TRANSPARENCY

Boom Shiba is decentralized and supported by its community of enthusiasts. We encourage open communication and believe trust, transparency, and community are the 3 pillars to building longevity.

COMMUNITY

Boom Shiba has one of the fastest growing and most loved communities in crypto we believe that only together we are strong. Community is everything and Boom Shiba strives to include everyone from around the globe.

TRUST

In cryptocurrency market trust is paramount. That means full transparency not only in the community and development but also in security efforts.

Security

Locked Liquidity

Initial liquidity will be locked for 12 months to provide holders with peace of mind that the token can always be exchanged. A trusted 3rd party, DXLock, will operate as the middle man to ensure that all raised liquidity is locked in a secure locker for the full timeframe.

Contract Audit Post Launch

In an effort to increase transparency and ensure security, the team has purchased a top-tier audit with HASHEX. We'll be able to ensure no vulnerabilities can be found such as:

- Integer Overflow
- Integer Underflow
- Callstack Depth Attack
- Timestamp Dependency
- Parity Multisig Bug
- Transaction-Ordering Dependency

The token contract is verified and available for viewing on [bscscan](#).
